

Open the green gate and go through.

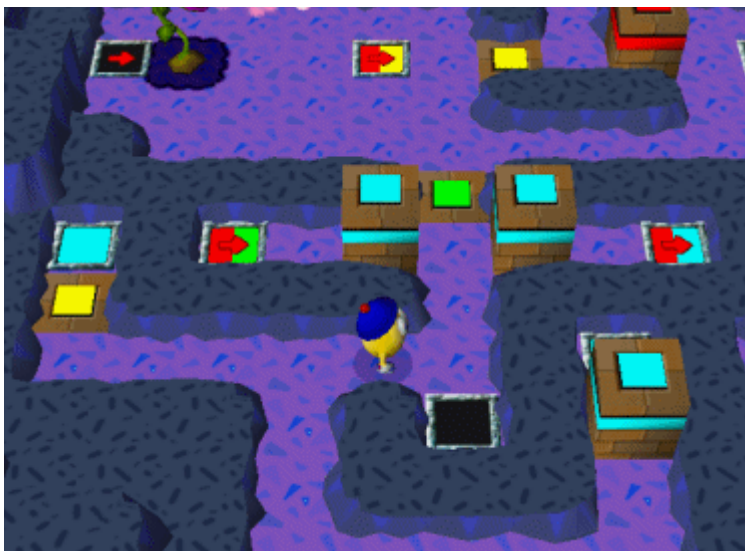

Don't be tempted to watch the turtle, you'll be wasting time that could be earning you more points.

Step on the white/orange, then the orange/yellow colour change switches, then the yellow switch. The now yellow gate will open and the kegs will be blown up. Make the scritter go onto the pink button.

Go through yellow gate, avoiding fireballs, then through pink gate and move the scritter off the pink button. Walk over the pink switch to let yourself back out, then over the dark blue/pale blue colour change switch, collect gems.

Go back through yellow and green gates and open pale blue gates. Press the red/pale blue colour change switch, then open the now pale blue gate with other pale blue switch.

The scritter and the kegs will be blown up.

Walk back through the green, yellow and pink gates, over the ice and round to the star and key, avoiding the fireballs.

Notice the turtle in the cage.
What was he there for?
